

CYBER SECURITY WORKSHOP

Every organization is responsible for ensuring cybersecurity. The ability to protect its information systems from impairment or even theft is essential to success. Implementing effective security measures will not only offer liability protection; it will also increase efficiency and productivity.

With our “Cybersecurity” workshop, your participants will discover the fundamentals of cybersecurity as well as the methods that should be implemented to make sure their computer systems are protected.

OBJECTIVES:

- Understand different types of malware and security breaches
- Know the types of cyberattacks to look out for
- Develop effective prevention methods
